

SLATS

Knotwood's slat systems improve curb appeal, provide security and increase privacy. Our modular components create multiple styles that are light weight, easy to install and require no welding.

Slats are easily inserted horizontally, vertically or diagonally into U channel framing. Our slats are also non-combustible, providing a safe and practical solution for any project.

FIRE RESISTANT

Knotwood slats are **non-combustible** and achieve an **A2-s1,d0 fire rating** according to EN 13501-1 testing standards.

INSTALLATION

Our slat system is designed for easy installation with **minimal screws and fixings**. For detailed instructions, please visit www.knotwood.co.uk.

COLOURS

Knotwood's specialised sublimation process transfers our unique wood grain designs onto a powder coated surface. The result is a **natural timber aesthetic** with a textured matt finish.

To view our full colour range, please head to www.knotwood.co.uk

ANTI MAR

Knotwood's sublimation process uses high quality inks and powders, that when baked together **creates a durable hard wearing coating**. This coating is resistant to most household solvents and cleaning products resulting in a superior low maintenance product.

MAINTENANCE

The beauty of Knotwood is **maintained with little effort**. A heavy rain will often be sufficient to wash dirt away although regularly cleaning Knotwood using a garden hose or a pressure washer is recommended.

WARRANTY

The coating technologies used in Knotwood products meet **globally recognized AAMA 2604 standards** with regards to colour retention and uniformity, weathering durability, humidity resistance, impact resistance and chemical resistance.

Our range of powder coated products are **supported by an up to 25 year performance warranty** on the powder coating.
